Message...

The people tend to perceive the Church and the service undertaken by the Church as chiefly institutional. The formal educational, health care and social development services of the Church do demand an organized institutional system. However, the humanitarian services do reach individuals, groups and other institutions in the midst of whom the Church finds herself.

The Archdiocese of Agra through the Agra Catholic Diocese Samaj Seva Sanstha (ACDSSS) does keep its commitment towards society by undertaking non-formal, non-institutional, people based, affordable, development programmes. It does have an established record of reaching out to the rural masses through practical, sustained, viable and effective programmes.

As the Church-run Social Service Society, ACDSSS is alerted afresh with the questions: "What kind of world do we want to leave to those who come after us, to children who are now growing up"! Pope Francis raises the questions in the context of: "Care for our Common Home - The World and Environment", in his Encyclical "Laudato Si".

The projects of ACDSSS envisage integral human development inclusive of social, ethical, moral, spiritual and human values that unitedly streamline cultural, religious, political, intellectual and material pursuits of the people, care for Mother Earth covers our concern for "climate change which is a global problem with serious implications, environmental, social, economic, political and for the distribution of goods".

In the path of people's progress, ACDSSS strives to involve itself in restoration of dignity, respect, equal rights, self esteem and self-reliance, women's empowerment, rights of the girl child, the differently abled and of the marginalized of the society. Preservation of nature, ecological balance and the concern of climate change take on a new impetus. Hygiene and health care, awareness of communicable diseases come within the objectives of ACDSSS.

Environmental pollution, contamination of water, deforestation, indiscriminate mining, erosion of earth leading to natural disasters are a threat to human life. The "throw away culture causes the earth, our home to look more and more like an immense pile of filth" (Pope Francis). To address this there is a need to invent models of re-use and recycling by limiting the use of non-renewable resources (like plastic). ACDSSS has a challenge to make people aware of the right use of natural resources. Clean drinking water, clean environment, clean conscience, heart and mind, a clean human society is the need of our times.

I appreciate the able leadership of Rev. Fr. Vinoy P. M., the Director, who successfully coordinates and carries out the tasks with the help of his efficient team members.
God bless.

Albert D'Souza
Archbishop of Agra

From Director's Desk

Inclusive development is that which includes everyone, especially those who are marginalized and often discriminated. Those living in rural or remote communities or urban slums, often do not benefit from development initiatives and therefore inclusive development is essential to ensure that they are participating meaningfully in development processes and policies.

The effort of ACDSSS is to enable people to contribute in creating opportunities, share in the benefits of development, and participate in decision making. ACDSSS has been animating the lowest sections of the society to enable them to participate fully in all spheres of society. We see the glimpse of ACDSSS's struggle to preserve, protect and promote the basic values in this Annual Report.

Most of us are very fortunate to be born into a liberal family. But the fact is that a large section of the society still considers girl child as a burden upon the family. ACDSSS work relentlessly against the system of child labour, for the cause of women in the society and support the struggle against the suppression of children and young people especially for the rights of all children to education.

I appreciate all the volunteers of ACDSSS for their excellence and achievements. Responding to the call that received from God, we do work for progress and excel in every aspect of life not just do the minimum but maximum for other people.

We are grateful to Caritas India, Manos Unidas, Misereor, Italian People's Conference, Kinder Missionswerk, UKSVK, Jan Vikas Samiti, Liliane Founds and their donors for their kind support and generous contribution to bring progressive changes through targeted interventions.

I extend my sincere gratitude to all stakeholders who actively participated in our endeavour.

We are thankful to Most Rev. Dr. Albert D'Souza, Archbishop of Agra and the governing body members for their guidance and encouragement.

With thanks and gratitude

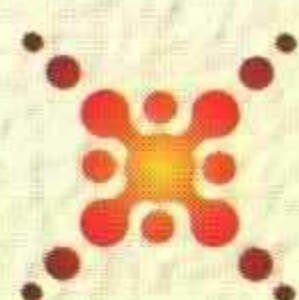

Fr. Vinoy P.M.
Director

Animator made it possible

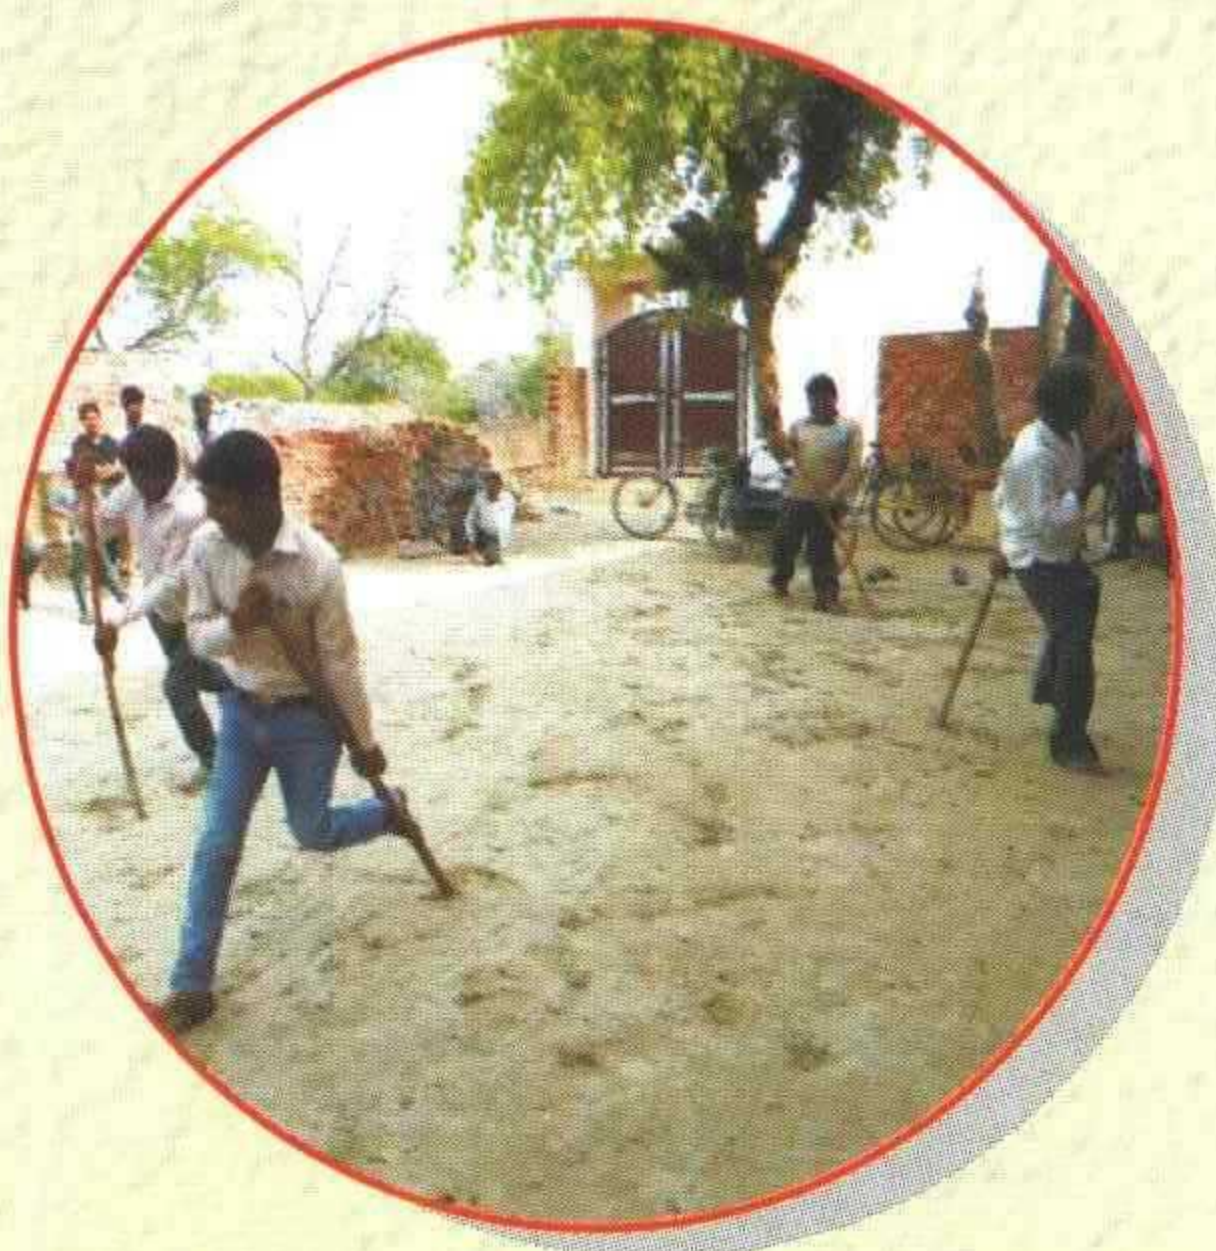

On 5th Feb'15 the animators of CBR project were on field visit in villages of Gajora, Bastorli and Dharampur. One of the animator Mr. Hamir Singh came in contact with a parent whose six months old child was born with both legs joint together. He then advised and motivated the parents to refer the child to doctor Rajeev Gupta at Sarthak Nursing Home, Agra. As he had advised them to meet the doctor they went and met the doctor and found out that the mother of the child was not immunized during the time of pregnancy. He too explained the importance of immunization before and after the delivery. Doctor suggested that the child could be saved only by surgery. Then the parents agreed upon the suggestion provided by doctor and immediately the child underwent surgery and the legs were separated. Then the doctor advised the parents to use shoes in future for the complete healing of legs. Even though this family was financially sound to meet the expense, they were illiterate and ignorant of the immunization. The family is grateful to the doctor as well as to the organization.

ADHIKAR PROJECT

Farmer's worry saves the paddy field

20 farmers of Junsuty villager were worried to see their paddy fields were drying with excess of heat and did not know what to do about. One of the farmers Mr. Gulab Singh informed this situation to Mr. Kumarpal the animator working under Adhikar project on 17th July 2014. He then the very next day made a visit to the farmers and had an emergency meeting with them and gathered all the details of the paddy fields. The farmers explained to him and to verify the same the farmers along with the animator went to see the paddy fields. As it was explained by the farmers he found the same situation. He then immediately told them about Khandelwal private company at Mathura who helps and provides guidance to farmers. They then decided immediately to visit Khandelwal Private Company along with the animator. The animator plucked up few paddy plants and rapped it in a paper and along with 20 farmers went to Mathura and met Mr. Alikhan the manager of the company and explained to him their problem and also showed the paddy pants too. After learning the situation Mr. Alikhan the manager promised them that he would give his full support and guidance in which ever way he could. On 19th July 2014 Mr. Alikhan and his team reached the spot and sprayed TKS-PYRI, Bispribac Sodium 10 SC in the paddy fields and advised them not to transplant immediately but after 10 days. After 10 days the farmers were able to transplant only 17 biggas of land out of 38 biggas. Other paddy fields could not be saved since it was dried up completely. The farmers are very grateful to ACDSSS and the donor agency for intervening in the lives of poor farmers and saving their lives.

Unfertile to fertile land

36 hectors of unfertile land of Nagari and Kudarvan villages for many years was left unheard and undone. After the intervention of Agra Catholic Diocese Samaj Seva Sanstha, working for the farmers under Adhikar project since 2012 at Mathura in 16 villages of 6 panchayats was able to solve this issue. Mr. Manvendra, the animator of the project learned the situation and mobilized 200 farmers and had lot of discussions on land which was left uncultivated. After many discussions on the same matter they came to the conclusion that they should approach government office Krashi Vigyan Kendra at Mathura. As it was decided during the meeting the farmers approached the said department and requested them to do the test of the soil. At the request of farmers Krashi Vigyan Kendra (K. V. K.) sent Mr. Mukesh and team to the spot and took soils samples from different fields for testing and found that there was excess of salt in the fields that is why the land was unfertile. This land could be made fertilized if proper process is done. After getting the report from Mr. Mukesh in the month of June 2014, 31 farmers approached Mr. Pradeep Sharma Agriculture Development Officer at Mathura and presented the report of the land and requested him to do the needful. Mr. Pradeep Sharma then accepted their request and promised them that he would help them in this regard. On 13 July 2014 Mr. Pradeep Sharma under the Land Development Project, 1.5 miter high kaccha mud-walls were raised for 25 hectors of land. After which lot of water and Jipson was put in the fields and with tractors the soil was made upside down in order to take out excess salt from the fields and salty water was taken out through drainages. Then 210 farmers received 2500 Kg. of fertilizer and 1050 kg paddy and 840 kg dhecha seeds. Now the 85 Farmers are cultivating paddy. They feel happy and proud that they could make use of unfertilized land to fertile land. Thus the voice was added to the voiceless through the Adhikar Project.

Income Generating Activity

IGA for Livelihood through vendor shops and vegetable sails project was funded by Caritas India, Delhi from 1st April 2014 to March 2015. The 21 families who were selected for this programme were the most backward families who are below poverty line and their earning was only Rs. 1500/- to 2000/-. They did not have a proper house to live or proper food to eat. Thus ACDSSS came forward to support 21 families with hand cart to start their business.

This livelihood programme has helped them to find gainful employment and become breadwinners of their families. Consequently their social status has been enhanced. These families are encouraged to continue the livelihood programme and to sensitize other families to adopt other income generating activities.

This project has increased their income of Rs. 4000/- to 5000/- per month. This has enabled them to lead a respectable life in the society. Women of the families also help out in sales, if the men have any other work, which is adding to their family income. Therefore the women are also occupied and it is increasing their self confidence.

Women Empowerment Programme, Baroli Ahir

Women Empowerment, Baroli Ahir project was started from October 2014. The goal of the project is to empower the women in 30 villages of Agra District so that they have greater control and excess on their own lives and be the agents of transformation of society

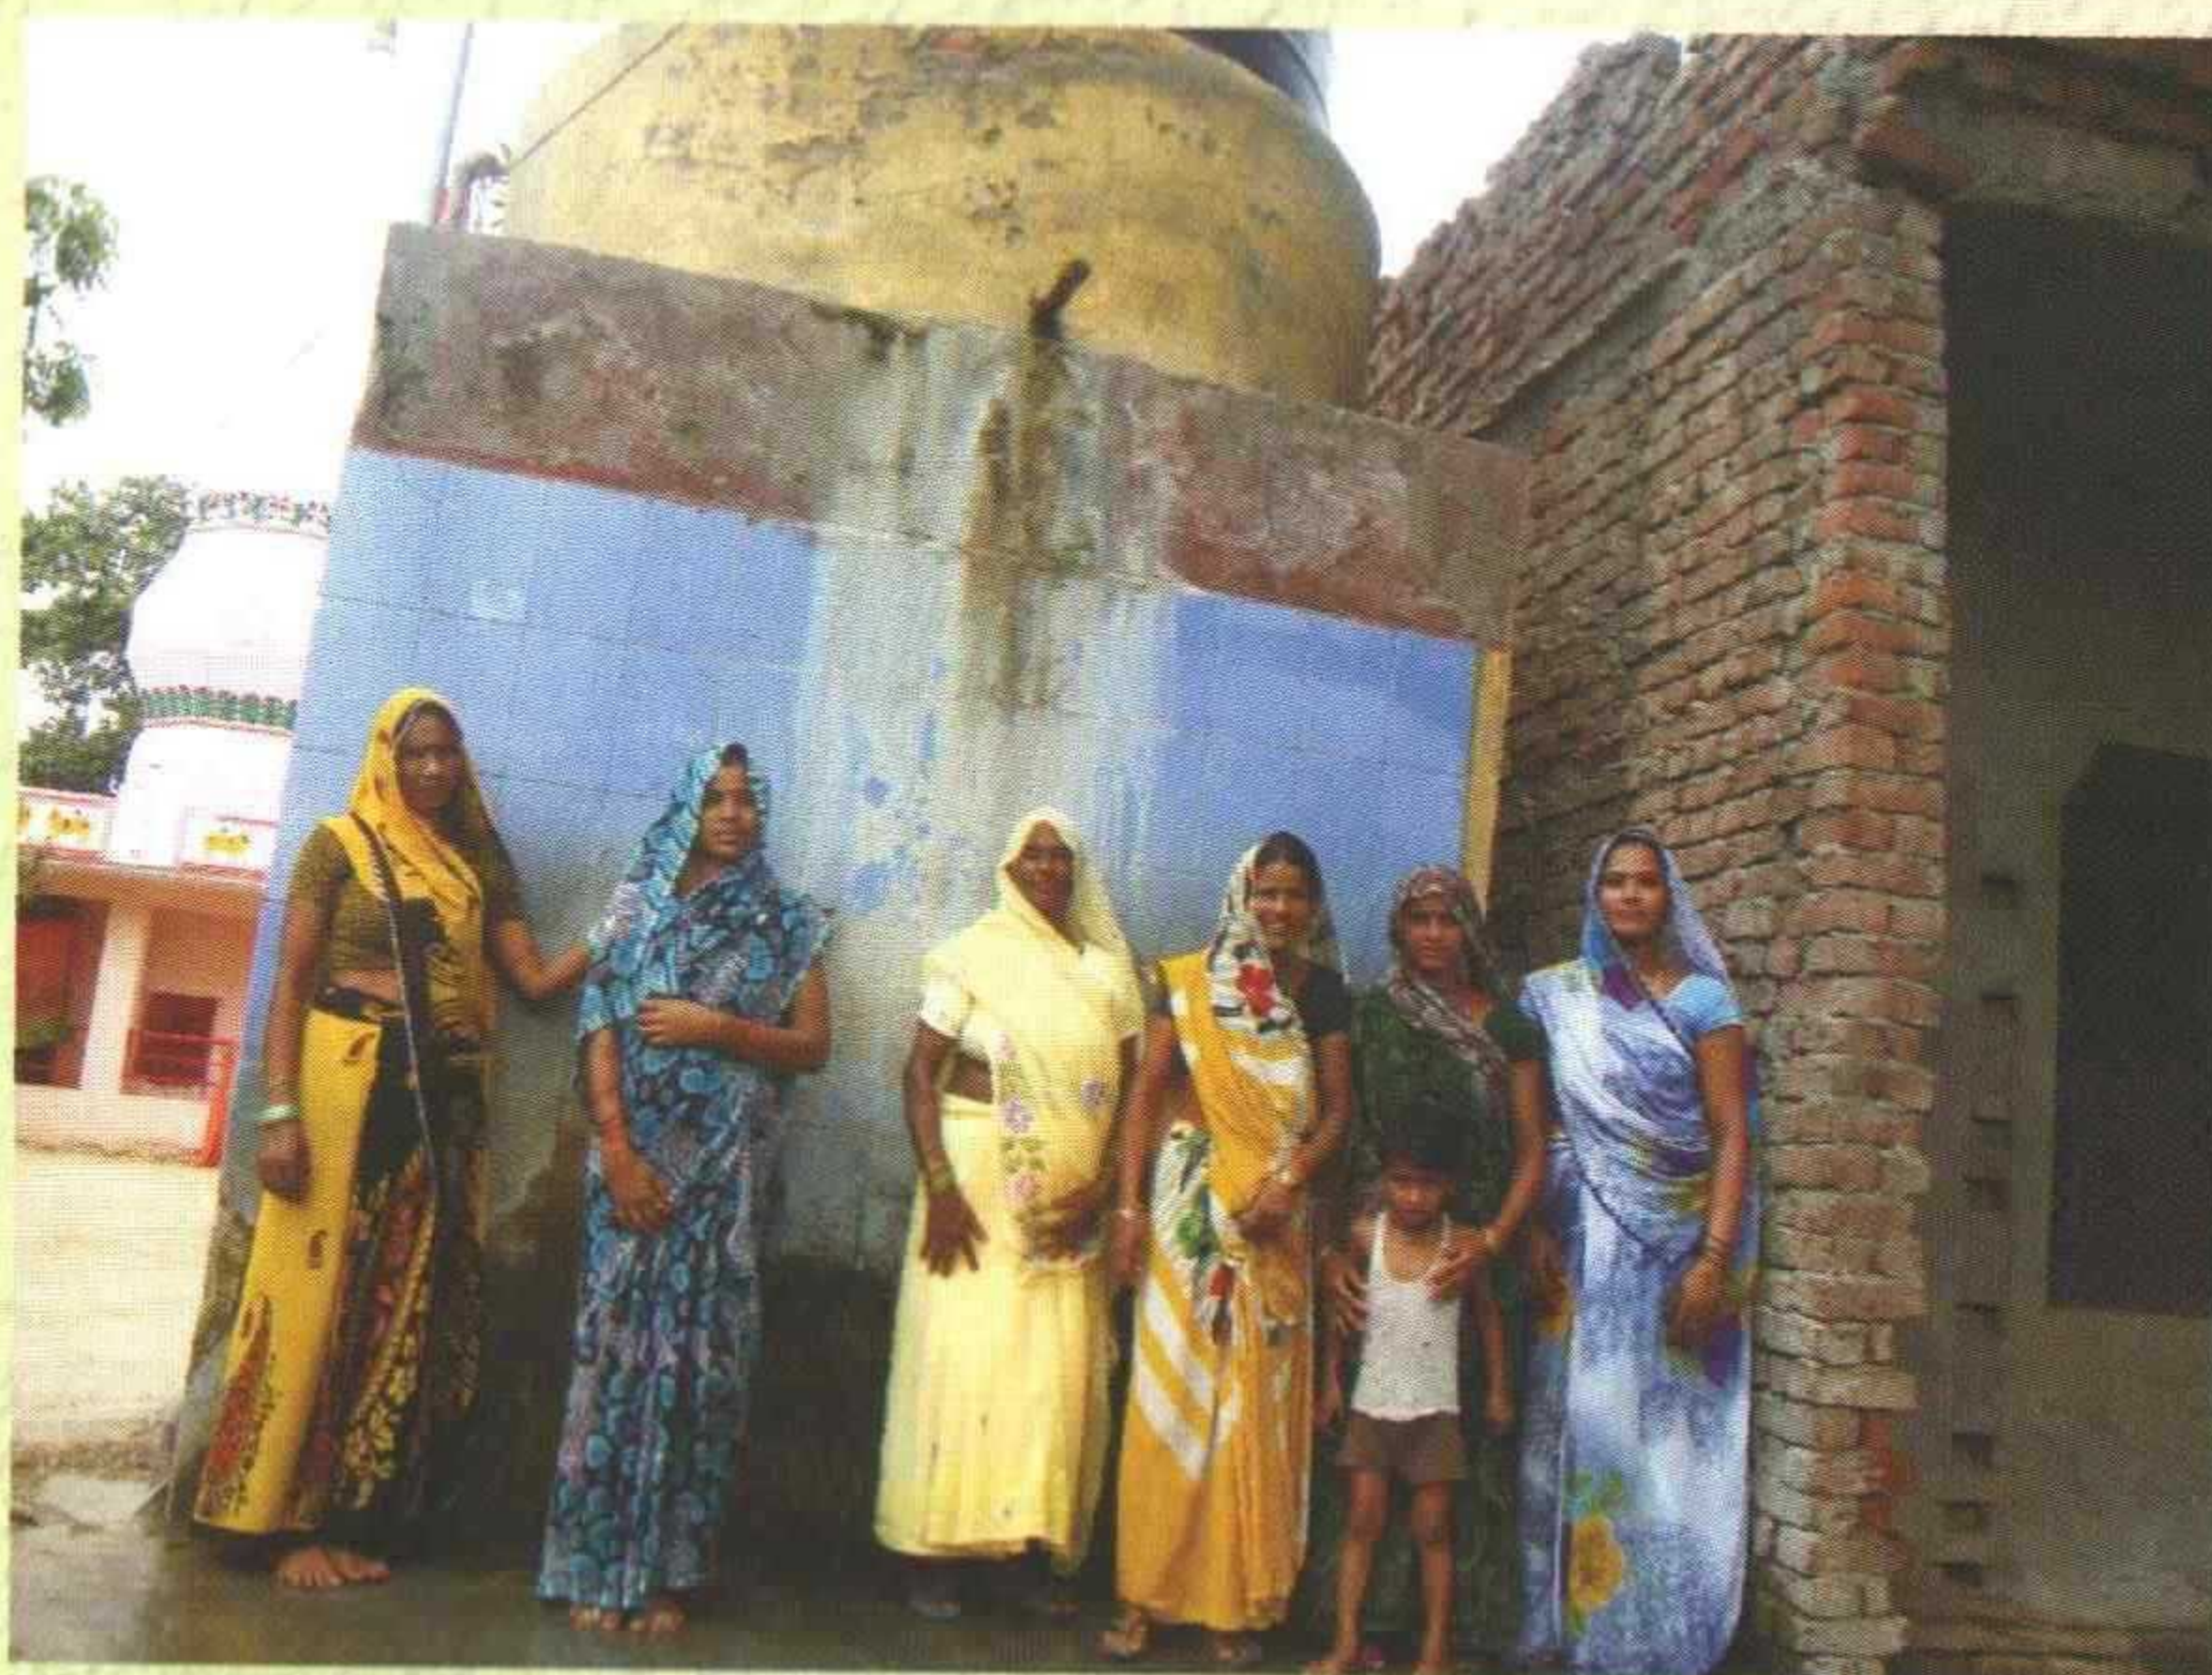

The main objective of this women empowerment program is to enhance the socio- economic status of the most vulnerable section of society by strengthening Self Help Groups and through training programs like Gender discrimination, Gender Sensitization, social Awareness on health, Linkage & Networking with bank and avail other Government Schemes etc.

The formation and strengthening of Mahila Mandals, Vikas Samiti, Bal Mandal and Education centers (NFE) have provided base for this empowerment process.

Self Help Group (SHG) is one of the concepts, which tries to bring justice to women through their socio economic upliftment. ACDSSS is making all possible efforts to bring recognition and respect to the status of women in the society. Total 28 Non Formal Education centers have been started and 280 children are learning in NFE centers. 24 disability certificates, 5 people were referred to hospitals and 3 people's road ways and railway pass with concession have been availed.

Impossible to Possible

On 21st January 2015, Mr. Ashok the coordinator and Mrs. Rekha the animator organized SHG formation meeting at Akbarpur village, where 22 women participated. During the meeting women expressed their problems that they are not getting any facilities from Block like road, drainage, repair of water tank, old age pension and widow pension etc. The coordinator explained to them the advantages of SHG formation and how through SHG they can approach Block and fight for their rights and solve the problems of the village. After much discussion and explanation 20 women agreed upon to form a group and the same day the group was formed and the group was named Durge Self Help Group. One of the members Mrs.

Nirma suggested that water is most important in life, we have water tank which is under repair for the past 4 months and gram Pradhan has not done any thing. There fore we shall meet Pradhan together and request him to repair the tank. So as they had decided that they would go and meet the Gram Pradhan on 24th January 2015, all 20 women went and met Mr. Chetram Dhankar and explained to him about the condition of the tank. He then promised that he would repair within 10 days. But he did not keep up his promise. Women were restless until they could get the tank repaired. After 10 days they themselves organized meeting with other village women and decided once again to meet Pradhan. So on 5th February 2015 women went and met Pradhan. Pradhan again requested them to give him 10 more days and he would do the needful. Even though reminded many times and the time was given to Gram Pradhan to repair the tank he would dodge them every time. On 21st February 2015 the women organized SHG meeting and informed Mr. Chetram to be present for the meeting. As the time was given to Pradhan he came and participated in the SHG meeting. Women once again explained to him about water problem in the village. He saw and believed what women were saying was true and by seeing the unity and enthusiasm of women he the very next day began to repair the tank and he promised them within 15 days the tank will be in working condition. On 3rd March 2015 repair work was completed and people of that area started to use the tank water. At last women understood the meaning and strengths of SHG. Thus constant efforts and timely guidance made SHG members to be successful. All the villagers were very happy and grateful to SHG members and co-workers of ACDSSS.

Empowerment of Adolescent Girls

Empowerment of the citizens of tomorrow i.e. adolescent girls and boys is an important issue in the present scenario. Thus the organization has been promoting the empowerment of these focus groups through different ways and means. The first and foremost task in this direction is formation of groups in order to pool the collective energy. From time to time, these groups are sensitized and capacitated on the issues of health, education, responsibility for their villages and access to government programs.

After four years of hard work in the project area, 110 adolescent girls wanted to experience life outside their village. They expressed their wish to the coordinator and supervisor who tried their best to convince their parents and brought smile on their faces. The parents were not only got convinced to send them for an exposure to Nand Gaun, Barsana, Mathura, but they agreed to bear the expenses. On 16th October 2014 their dream was fulfilled with the support of their parents.

Developmental work through Vikas Samitis

Gajora, Kiloni, Bastorli and Dharampur villages fall under Gajora Gram Sabha. During the rainy season due to flood from river Ganges, the people of these four villages were facing disaster every year. They too face problems like transportation, no proper road which affects their daily livelihood. The members of Shyamgiri Vikas Samiti Gajora and Dr. Bheem Rao Ambedkar Vikas Samiti, Bastorli came together for a meeting along with animator and Gram Pradhan and discussed the problem in detail. With the help of Gram Pradhan, Mr. Rajesh Kumar, 45 members of both Vikas Samiti and 40 other members from the villages wrote an application and submitted to D.M. Mr. J.G Duvedi at Kasganj. Seeing the enthusiasm and interest of people for the development of villages, the DM ordered Mr. Jogendra Singh, PWD contractor to build bridge and one meter high road from Dharampur to Shabaaj and Gajora to Sungadi. With the cooperation and effective work of both Vikas Samities and the village people the work was successfully completed. Since the villagers have received various trainings, gained knowledge and the importance of their village development, they are very grateful to the organization.
